# OpenAI Playground

The screenshot shows the OpenAI Playground interface. On the left, a sidebar menu includes PLAYGROUND, Chat (selected), Assistants, TTS, and Completions. Below the menu is a Forum link and a Help link. The main area is titled "Chat" and shows "gpt-4o" selected. A "SYSTEM" section allows entering system instructions. At the bottom, there's a text input field with placeholder "Enter user message..." and two buttons: "User" and "Add". To the right, there are "Presets", "Save", and "Compare" buttons. A "Functions" section has a "+ Add function" button. Configuration options include "Response format: Text" (set to 0), "Temperature" (set to 1), "Maximum Tokens" (set to 256), "Stop sequences" (input field), "Top P" (set to 1), "Frequency penalty" (set to 0), and "Presence penalty" (set to 0). A note at the bottom states: "API and Playground requests will not be used to train our models." with a "Learn more" link.

# Prompting Guide

Prompt Engineering

## Prompt Engineering Guide

Prompt engineering is a relatively new discipline for developing and optimizing prompts to efficiently use language models (LMs) for a wide variety of applications and research topics. Prompt engineering skills help to better understand the capabilities and limitations of large language models (LLMs).

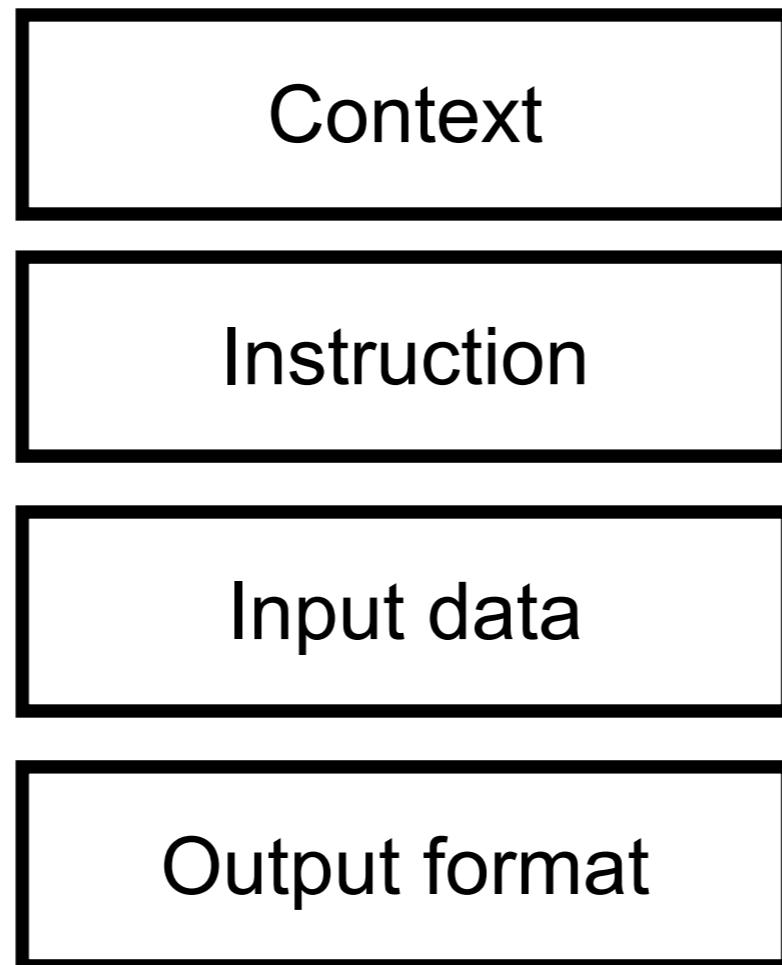

Researchers use prompt engineering to improve the capacity of LLMs on a wide range of common and complex tasks such as question answering and arithmetic reasoning. Developers use prompt engineering to design robust and effective prompting techniques that interface with LLMs and other tools.

Prompt engineering is not just about designing and developing prompts. It encompasses a wide range of skills and techniques that are useful for interacting and developing with LLMs. It's an important skill to interface, build with, and understand capabilities of LLMs. You can use prompt engineering to improve safety of LLMs and build new capabilities like augmenting LLMs with domain knowledge and external tools.

# Hallucinations in LLMs

The diagram shows two separate AI interactions between a user (person icon) and a large language model (robot icon).  
  
In the top interaction, the user asks: "Is 9677 a prime number?". The model responds: "No, 9677 is not a prime number. It can be factored into 13 and 745, as  $9677 = 13 \times 745$ ". This response is marked with a red X and grouped under "incorrect assertion".  
  
In the bottom interaction, the user asks: "Is 9677 divisible by 13?". The model responds: "No". This response is marked with a green checkmark and grouped under "snowballed hallucination".  
  
A note on the right states: "in a separate session, GPT-4 recognizes its claim as incorrect!".

Is 9677 a prime number?

No, 9677 is not a prime number.  
It can be factored into 13 and 745, as  $9677 = 13 \times 745$ .

Is 9677 divisible by 13?

No

} incorrect assertion  
} snowballed hallucination

in a separate session,  
GPT-4 recognizes its  
claim as incorrect!

# Count r in Strawberry !!

The word "strawberry" contains 2 instances of the letter "r".

The word "strawberry" contains 2 occurrences of the letter "r".

<https://hackernoon.com/why-cant-ai-count-the-number-of-rs-in-the-word-strawberry>

# Count r in Strawberry !!

## ✳️ Perplexity

### Counting the Letter "R" in "Strawberry"

To count the number of times the letter "R" appears in the word "strawberry", we can break it down character by character:

S-T-R-A-W-B-B-E-R-R-Y

In this analysis, we see that the letter "R" appears 3 times in the word "strawberry" ① ② ③.

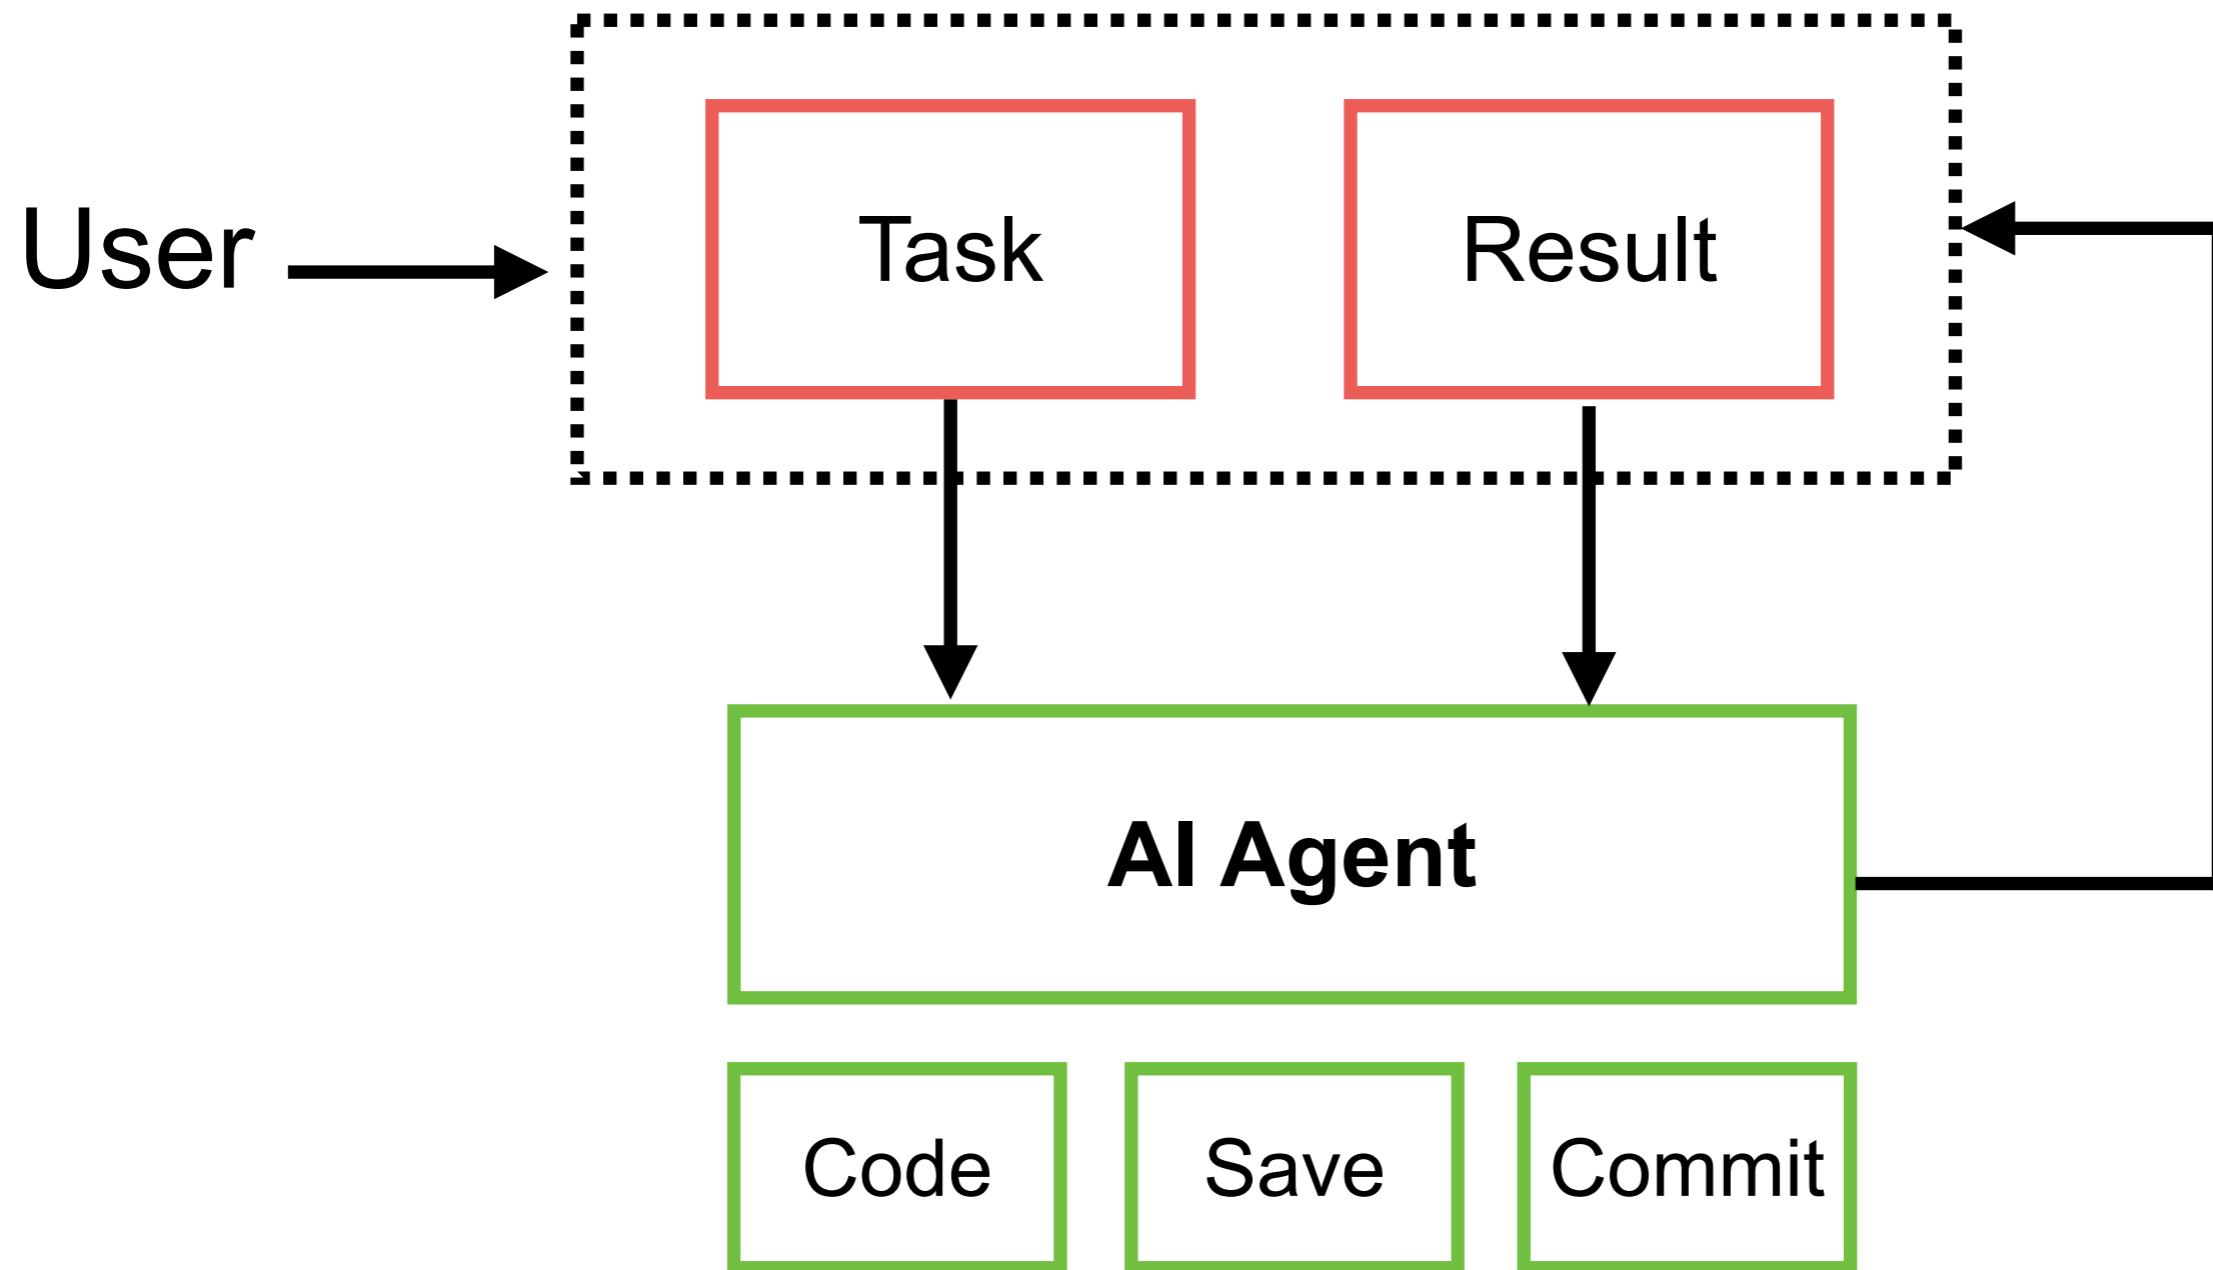

Some key points:

- Language models like ChatGPT do not always count letters correctly in words like "strawberry" ② ③
- This is because they break down words into tokens rather than individual letters, and the tokens may not map directly to the letters ②
- To get the right answer, you can have the AI spell out the word and count the "R"s as it goes ④
- Counting letters is a simple task for humans but can trip up even advanced AI systems ⑤ ⑥

So in summary, the letter "R" appears 3 times in the word "strawberry". While this is obvious to humans, it can be a tricky problem for current AI language models to solve consistently.

# Perplexity.ai

The screenshot shows the Perplexity.ai web interface. At the top, there's a navigation bar with a logo, a search bar containing the query "Create login form with reactjs and tailwind css", and a timestamp "Now". To the right of the search bar are icons for "Edit", "Share", and "Copy". On the left side, there's a sidebar with links for "New Thread", "Home", "Discover", "Library", "Sign in", and a prominent "Sign Up" button. The main content area displays the search results. The first result is titled "Create login form with reactjs and tailwind css" and has an "Edit" link. Below it is an "Answer" section with a brief description of how to create a login form using React.js and Tailwind CSS. A code snippet in a terminal window shows commands to set up a React project. Further down, another section titled "Step 2: Install Tailwind CSS" provides instructions on how to install Tailwind CSS. On the right side of the main content, there are three buttons: "Search Images", "Search Videos", and "Generate Image", each with a plus sign icon. A small sidebar on the right shows a "Sign in or create an account" prompt with options for Google sign-in and email continuation.

Create login form with reactjs and tailwind css

Edit

Answer

Creating a login form using ReactJS and Tailwind CSS is a great way to build a modern, responsive user interface. Below, I'll guide you through the process step-by-step, including setting up your React environment, installing Tailwind CSS, and creating a simple login form.

Step 1: Set Up Your React Environment

If you haven't already set up a React project, you can do so using Create React App. Open your terminal and run:

```
bash
npx create-react-app my-login-form
cd my-login-form
```

Step 2: Install Tailwind CSS

Next, you need to install Tailwind CSS. You can do this by following these steps:

# Canva

The screenshot shows the Canva interface. On the left, the 'Magic Media' section is active, displaying a text input field with the placeholder "Describe the image you want and we'll generate it for you." Below it is a button labeled "Try an example". To the right of the input field is a purple button with a white plus sign and the name "Charlie". At the bottom of this section are three style options: "None", "Filmic" (selected), and "Watercolor". A large blue button at the bottom right of this panel says "Generate AI Images". On the right side of the screen, the "Storyboard" feature is shown. It displays a storyboard frame for a scene titled "Day • Establishing Shot • Pan". The frame shows a landscape with clouds and green hills. A callout box on the right says "Add sandstorm CGI in post prod". Another callout box below it says "APPROVED BY DIRECTOR" with the name "Sam" and "Vim". Below the storyboard frame, the text "Action: Opening shot of the barren, red Martian landscape. We hear the sound of a rover approaching. Cut to the inside" is displayed. The top right corner of the screen shows a user profile with three profile pictures and a "Share" button.

# FreePik

The FreePik homepage features a large, blurred background image of a flower. At the top left is the "FREEPIK" logo. The top navigation bar includes links for Tools, Images, Icons, Videos, Templates, PSD, Mockups (with a "NEW" badge), More, Pricing, and Sign in. A central call-to-action says "Create great designs, faster". Below it, a sub-headline reads "High-quality photos, videos, vectors, PSD, AI images, icons... to go from ideas to outstanding designs". A search bar with a dropdown menu for "Assets" and a "Search all assets" input field is positioned above a row of three search buttons: "menu", "coloring pages", and "magazine mockup". At the bottom, a call-to-action button says "Sign up for 10 daily free downloads and access to AI tools" next to a "Sign up now" button.

<https://www.freepik.com/>

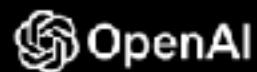

# Hugging Face

The screenshot shows the Hugging Face website. On the left, there's a large yellow smiley face icon. Below it, the text "The AI community building the future." is displayed in a large, bold, white font. Underneath that, a smaller text reads: "The platform where the machine learning community collaborates on models, datasets, and applications." To the right, there's a search bar with placeholder text "Search models, datasets, users...". Above the search bar are navigation links: "Models", "Datasets", "Spaces", "Docs", "Solutions", "Pricing", "Log In", and "Sign Up". The main content area is divided into two sections: a "Tasks" sidebar on the left and a "Models" catalog on the right. The "Tasks" sidebar lists various AI tasks with corresponding icons: Text-to-image, Image-to-Text, Text-to-Video, Visual Question Answering, Document Question Answering, Graph Machine Learning, Computer Vision, Depth Estimation, Image Classification, Object Detection, Image Segmentation, Image-to-Image, Unconditional Image Generation, Video Classification, Zero-Shot Image Classification, Natural Language Processing, Text Classification, Token Classification, Table Question Answering, Question Answering, Zero-Shot Classification, Translation, Summarization, Conversational, Text Generation, Text2Text Generation, Sentence Similarity, Audio, Text-to-Speech, Automatic Speech Recognition, Audio to Audio, Audio Classification, and Voice Activity Detection. The "Models" catalog on the right shows a list of available models, each with a thumbnail, name, type, update status, and metrics. Some examples include "meta-llama/Llama-2-70b" (Text Generation, updated 4 days ago, 4.25Bk, 9.54), "stabilityai/stable-diffusion-xl-base-6.9" (Updated 6 days ago, 3.201k, 399), "openchat/openchat" (Text Generation, Updated 1 day ago, 1.13k, 136), "lilyaswiel/ControlNet-v2-1" (Updated Apr 26, 1.1.67k), "cezspense/zeroscope\_v2\_XL" (Updated 3 days ago, < 2.00k, 334), "meta-llama/Llama-2-30b" (Text Generation, Updated 1 day ago, 4.325, 64), "tiiuae/Falcon-40b-instruct" (Text Generation, Updated 27 days ago, 3.285k, 859), "wizardLM/wizardCoden-1.5B-v1.0" (Text Generation, Updated 3 days ago, 12.5k, 932), "DenoVis/stable-diffusion-v1-4" (Text-to-Image, Updated Jun 17, 2 months ago, 3.440k, 3.02k), and "stabilityai/stable-diffusion-2-1" (Text-to-Image, Updated about 1 month ago, 3.78k, 2.17k).

# Product Owner ChatGPT Prompt

The screenshot shows the homepage of PromptLeo. At the top, there is a navigation bar with a logo (a purple circle with a white 'P'), the text "PromptLeo", and links for "Docs", "Contact", "Pricing", "Log In", "Sign Up", and a user icon. Below the navigation bar, the main title "Product Owner ChatGPT Prompts" is displayed in a large, bold, dark font. Underneath the title, there is a paragraph of text: "With so many tools available in 2023, it can be difficult to know how you can get the most out of ChatGPT. To help you out, this page offers over 100 ChatGPT prompt examples, ideas, and templates focusing on prompts for product owners." The background of the page has a subtle grid pattern.

# v0.dev

The screenshot displays the v0.dev platform's interface, which includes:

- A top navigation bar with a logo, "Private Beta" button, and a "report an issue" modal.
- Navigation links for "Product categories", "Hero section", "Contact form", and "Ecommerce dashboard".
- A main content area with tabs for "New Generations" and "Featured".
- Four cards representing different UI designs:
  - "Soccer Game" card: A landing page for a soccer game with two main sections labeled "Start" and "Reset".
  - "Enhance Your Education Journey" card: A hero section for an education platform featuring a large image and text: "Enhance Your Education Journey" and "The most comprehensive education platform providing individualized resources to assist your students and their growth".
  - "Quiz" card: A website layout with a sidebar and three main content areas labeled "Item 1", "Item 2", and "Item 3".
  - "Welcome to the Festival Fair" card: A landing page for a festival fair with a large image and text: "Welcome to the Festival Fair" and "Discover the best of our products and services at the Festival Fair".
- Annotations below each card:
  - "page for a soccer game,..."
  - "A hero section for a..."
  - "A website in a black and..."
  - "product tour like appcues"
- Two additional cards at the bottom:
  - "Quiz" card: Similar to the one above, showing a list of items.
  - "Ecommerce dashboard" card: A dashboard with sections for "Total Sales" (120), "Total Revenue" (200.00), and "Total Orders" (8).

# Demo

The image shows a screenshot of the Screenshot to Code AI interface. On the left, there's a sidebar with settings for "Generating" (HTML + Tailwind) and "AI Model" (GPT-4o). Below that is a progress bar indicating "Generating images...". A preview of the original screenshot shows a Google search results page for "Google Logo". On the right, the generated code is displayed in a large box, which includes the Google logo and a search bar with the query "ค้นหาด้วย Google" and "ต้องการค้นแม่ล่าเฉย". The generated code is as follows:

```
class="text-blue-500">English</a></div></body></html>
```

Below the generated code is a "Cancel" button.

At the bottom of the interface, there are tabs for "Desktop" (selected), "Mobile", and "Code". In the top right corner, there's a "Your account" section with a profile icon.

Claude Generate "Hello World" SVG

generate svg file for word "Hello World"

Certainly! I'll create an SVG file with the text "Hello World" for you.

>Hello World SVG  
Click to open image

I've created an SVG file containing the text "Hello World". Here are some details about the SVG:

1. The SVG has a viewBox of 0 0 200 100, which means it has a width of 200 units and a height of 100 units.
2. The text "Hello World" is positioned at x=10 and y=50 within this viewBox.
3. The font used is Arial (with a sans-serif fallback), and the font size is 24 units.
4. The text color is black.

You can use this SVG in various ways, such as embedding it in a webpage or using it as a standalone image. The SVG format allows for scaling without loss of quality, making it suitable for various display sizes.

Would you like me to explain any part of the SVG code or make any modifications to the design?

Copy ⚡ Retry ⚡

Claude can make mistakes. Please double-check responses.

Claude 3.5 Sonnet A 1

Last edited just now [Edit](#) [Publish](#)

The screenshot shows the Claude AI interface. On the left, a message from Claude generates an SVG file with the text "Hello World". It provides details about the SVG's dimensions (viewBox 0 0 200 100), text position (x=10, y=50), font (Arial), and color (black). It also notes that the SVG is suitable for scaling. Below this, there's a section for explaining the SVG code or making modifications. At the bottom, there are buttons for "Copy", "Retry", and "Edit". A note says "Claude can make mistakes. Please double-check responses." and offers a "Subscribe to Pro" button for 5x more usage. On the right, the generated SVG is previewed in a separate window, showing the large, bold "Hello World" text centered on a white background.

<https://claude.ai/>

# Demo

The screenshot shows the Claude AI interface with a demo titled "React Login Form with Tailwind CSS".

**Left Panel (Demo Preview):**

- Title:** Create login form with reactjs and tailwind css
- Description:** I'd be happy to create a login form using React and Tailwind CSS for you. This is a great use case for a reusable component, so I'll create it as a React artifact.
- Component Preview:** A button labeled "React Login Form with Tailwind CSS Click to open component".
- List of Features:**
  1. A form with email and password input fields
  2. State management for email and password using React hooks
  3. A submit handler that logs the email and password (you'll need to replace this with your actual login logic)
  4. Tailwind CSS classes for styling, including responsive design
  5. A "Remember me" checkbox
  6. A "Forgot your password?" link
  7. A submit button
- Usage Instructions:** To use this component in your React application:
  1. Make sure you have React and Tailwind CSS set up in your project.
  2. Copy this component into your project.

**Bottom Left (User Interaction):**

- Subscribe to Pro for 5x more usage with Claude 3.5 Sonnet.

[Get Started](#)

<https://www.postman.com/product/postbot/>

# PostBot

The screenshot shows the Postman application interface. A request is being made to `https://jsonplaceholder.typicode.com/users/1` using the `GET` method. The `Tests` tab is selected. The response body is displayed in Pretty JSON format:

```
1 {  
2   "id": 1,  
3   "name": "Leanne Graham",  
4   "username": "Bret",  
5   "email": "Sincere@april.biz",  
6   "address": {  
7     "street": "Kulas Light",  
8     "suite": "Apt. 556".  
9   }  
10 }  
11 
```

The response status is `200 OK`. A context menu is open on the right side of the interface, listing options such as `Add tests to this request`, `Test for response...`, `Visualize response...`, `Save a field from response`, and `Add documentation`. A modal window titled `New on Postbot` provides information about the AI feature, stating: "I can auto-complete tests to help you work faster! If you have a response available and type `pm.test()`, I'll suggest important tests that you might be looking for. Once you've entered the test name, I'll also provide the code to validate what you need."

# OWASP Top 10 for LLM app

<https://llmtop10.com/>

# OWASP Top 10 for LLM app

LLM01

## Prompt Injection

Crafty inputs can manipulate a Large Language Model, causing unintended actions. Direct injections overwrite system prompts, while indirect ones manipulate inputs from external sources.

LLM02

## Insecure Output Handling

This vulnerability occurs when an LLM output is accepted without scrutiny, exposing backend systems. Misuse may lead to severe consequences like XSS, CSRF, SSRF, privilege escalation, or remote code execution.

LLM03

## Training Data Poisoning

This occurs when LLM training data is tampered, introducing vulnerabilities or biases that compromise security, effectiveness, or ethical behavior. Sources include Common Crawl, WebText, OpenWebText, & books.

LLM04

## Model Denial of Service

Attackers cause resource-heavy operations on Large Language Models leading to service degradation or high costs. The vulnerability is magnified due to the resource-intensive nature of LLMs and unpredictability of user inputs.

LLM05

## Supply Chain Vulnerabilities

LLM application lifecycle can be compromised by vulnerable components or services, leading to security attacks. Using third-party datasets, pre-trained models, and plugins can add vulnerabilities.

LLM06

## Sensitive Information Disclosure

LLM's may reveal confidential data in its responses, leading to unauthorized data access, privacy violations, and security breaches. It's crucial to implement data sanitization and strict user policies to mitigate this.

<https://llmtop10.com/>

# OWASP Top 10 for LLM app

LLM07

## Insecure Plugin Design

LLM plugins can have insecure inputs and insufficient access control. This lack of application control makes them easier to exploit and can result in consequences like remote code execution.

LLM08

## Excessive Agency

LLM-based systems may undertake actions leading to unintended consequences. The issue arises from excessive functionality, permissions, or autonomy granted to the LLM-based systems.

LLM09

## Overreliance

Systems or people overly depending on LLMs without oversight may face misinformation, miscommunication, legal issues, and security vulnerabilities due to incorrect or inappropriate content generated by LLMs.

LLM10

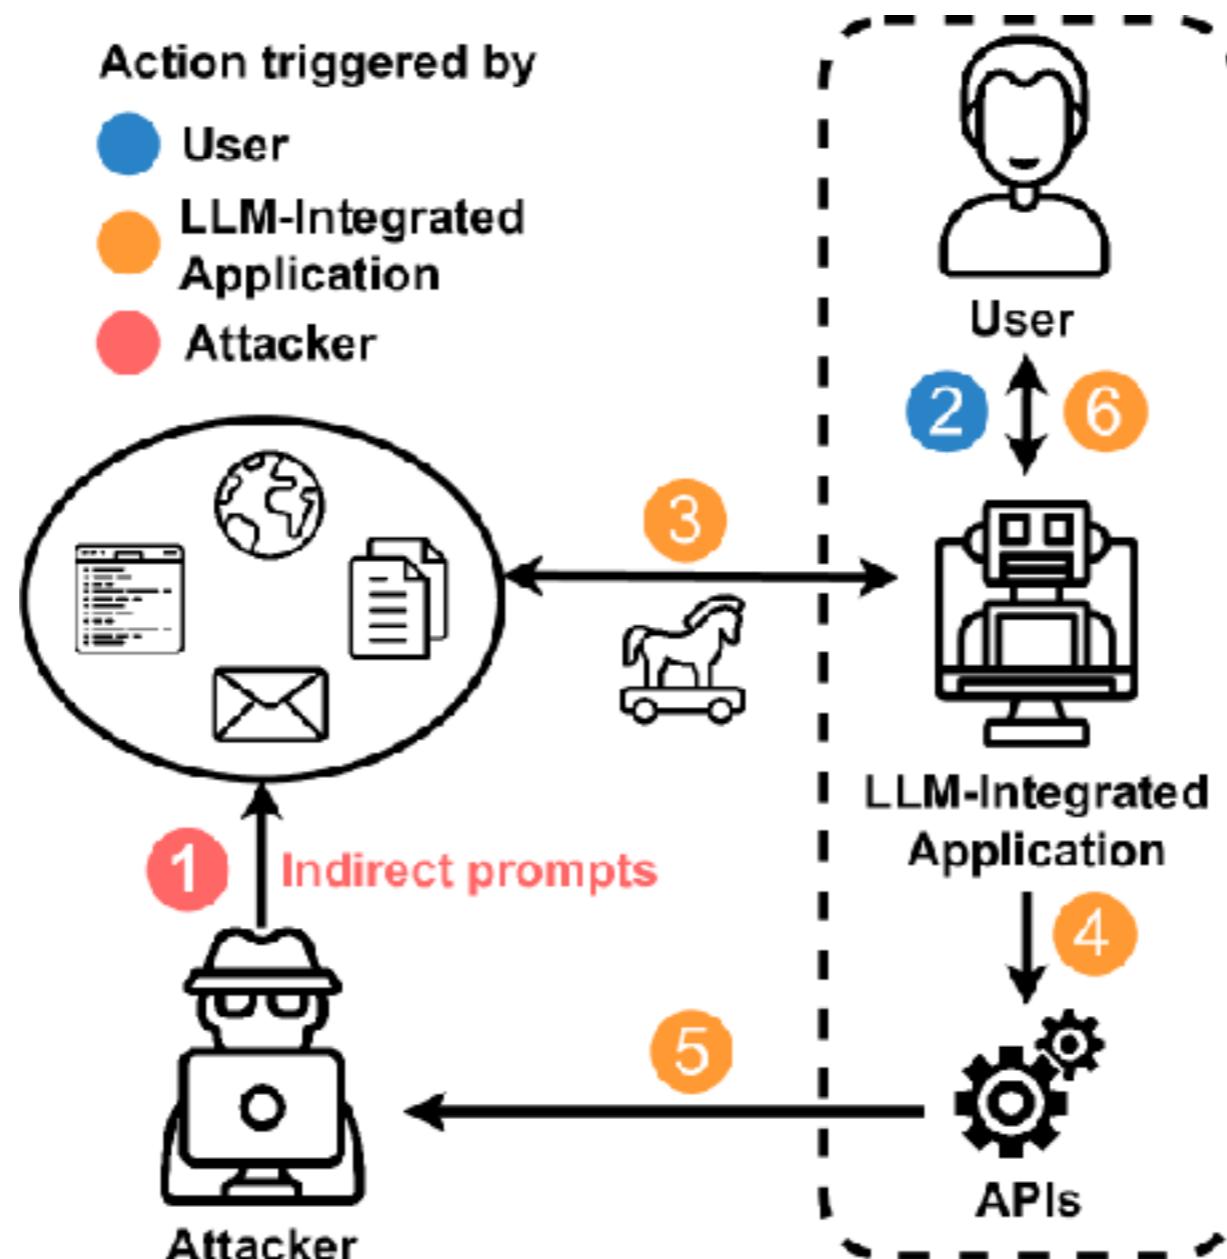

## Model Theft

This involves unauthorized access, copying, or exfiltration of proprietary LLM models. The impact includes economic losses, compromised competitive advantage, and potential access to sensitive information.

Generative AI

# AI Agent Tools

# Aider

Aider is AI pair programming in your terminal

Aider lets you pair program with LLMs, to edit code in your local git repository. Start a new project or work with an existing git repo. Aider works best with GPT-4o & Claude 3.5 Sonnet and can [connect to almost any LLM](#).
